California Academy of Sciences.

Post Office Box No. 2247.

San Francisco, Sept 13 1883

Dear Dr Gray:

I enclose you the Gilia about which I was questioned, return it to please when you are through with it.

Please present my thanks to Mr Watson for the fragments of Choiz sent me. He declines to send and trust us with originals, in which matter you see our practice differs.

In these days of easy and safe transmission, botanists could often save each other journeys for which time can ill be spared.

I shall have to ask for Eriogonums soon, I suppose.

Hoping soon to see your supplement I remain,

Yours Respectfully

Mary K. Curran
